

# Introducing the Compliance Central Dashboard

## Visibility is knowledge. Knowledge is power.

The driving concept behind the Compliance Central Dashboard is simple: identify and proactively address potential compliance risks. And the process is simple, too: answer a series of questions, review results, and receive a list of recommended solutions to help avoid fines and penalties.

The dashboard is both a compliance tool *and* a sales tool. Build an even deeper relationship with your current clients, attract new business, and increase revenue.

Make the most of the dashboard:

- **Immediate and transparent.** See if and where your client's level of compliance falls short.
- **Convenient and personal.** Save and print the dashboard on your client's behalf.
- **Convincing and proven.** Tout the dashboard to sell additional services and to highlight the value that TASC provides.
- **Consistent and trusted.** Routinely follow up and reassess for continued compliance.

## Three Steps to Compliance

**Assess** your client's needs. This easy-to-use tool also provides truly personalized solutions.

**Bundle** services into an easy-to-manage plan. That means one price, one invoice, and one onboarding process for your client.

**Be compliant** with TASC! We'll keep your client informed of changing regulations and when it is time to renew.

Remember, it's just as important to stay compliant as it is to be compliant!

**BECOMPLIANT**

TASC is making it easier than ever to be more efficient, compliant, and successful. **Log in to MyTASC to get started.**
