

Seeing 20/20 in 2020

Blue View Vision plan enhancements your employees will love

Our vision plans have always been about choice, convenience and care. In 2020, we're adding new features and benefits that make our new Blue View VisionSM plans even easier to use — and save members money, too!

- New small group plan designs with \$150, \$180 and \$200 material allowance for frames give you more choice and flexibility.
- Lower member costs on standard progressive lenses — a \$55 copay in 2020 vs. \$65 in 2019.
- New premium tiers that make lens upgrade costs easier for members to understand:
 - Tier 3 Premium anti-reflective lenses at an \$85 copay.
 - Tier 4 Premium progressive lenses at a \$175 copay.
- No employer premium contribution requirements for voluntary and non-voluntary (employer paid) plans.

These enhancements apply to new business with effective dates of January 1, 2020, or later. Quoting for these enhancements begins in October 2019 for small groups.
