

Dental networks at a glance

Blue Shield's dental PPO/INO network is nearly 45,000. Our dental HMO network is the second largest in the state with more than 26,000 providers. Dental providers in and out of California are available through a contracted dental plan administrator.

Use this chart to see dental provider options when choosing between dental PPO/INO and dental HMO plans. The dental INO network uses the same providers as the dental PPO network; no benefits are paid if the member goes to non-network providers. For more information about all of our dental plans, visit blueshieldca.com.
