## PPO Footnotes

- <sup>1</sup> Any amount applied toward the calendar year deductible (if applicable) for covered services and supplies received from an in-network provider will not apply toward the calendar year deductible for out-of-network providers. In addition, any amount applied toward the calendar year deductible for covered services and supplies received from an out-of-network provider will not apply toward the calendar year deductible for in-network providers.
- <sup>2</sup> Copayments or coinsurance paid for in-network services will not apply toward the out-of-pocket maximum for out-of-network providers, and copayments or coinsurance paid for out-of-network services will not apply toward the out-of-pocket maximum for preferred providers.
- <sup>3</sup> Preventive care services are covered for children and adults based on guidelines from the U.S. Preventive Services Task Force Grade A and B recommendations; the Advisory Committee on Immunization Practices (ACIP) that have been adopted by the Centers for Disease Control and Prevention (CDC); and the guidelines for infants, children, adolescents, and women's preventive health care as supported by the Health Resources and Services Administration (HRSA).
- <sup>4</sup> Listed cost share is for services provided through Babylon; For all other providers, telehealth cost share mirrors in-person cost share based on type of service provided.
- <sup>5</sup> The three prescription drug tiers are: Tier 1 – Most generic drugs and low-cost preferred brands. Tier 2 – Non-preferred generic drugs; preferred brand-name drugs; or drugs recommended by the plan's Pharmacy & Therapeutics (P&T) Committee based on drug safety, efficacy and cost. Tier 3 – Non-preferred brand-name drugs; drugs recommended by the P&T Committee based on drug safety, efficacy and cost; or drugs that generally have a preferred and often less costly therapeutic alternative at a lower tier. The Essential Rx Drug List is a list of prescription drugs that are covered by this plan. Some drugs require prior authorization from Health Net. For a copy of the Essential Rx Drug List, go to Health Net's website.
- <sup>6</sup> Tier 4 drugs include when: the Food and Drug Administration (FDA) or drug manufacturer limits distribution to specialty pharmacies; or self-administration requires training, clinical monitoring; or the drug was manufactured using biotechnology; or the plan's cost (net of rebates) is greater than \$600. Self-injectable drugs (other than insulin) are considered specialty drugs. Specialty drugs require prior authorization and must be obtained from a contracted specialty pharmacy vendor.
