

ease

**Ease & Allstate Benefits have partnered to make
worksite coverage easier.**

Rate Library, Direct Submission, & Automatic Changes

Rate Library

Use the Allstate Benefits Rate Library to quickly set rates and configure eligibility information, start dates, and other details for plans supported by the connection.

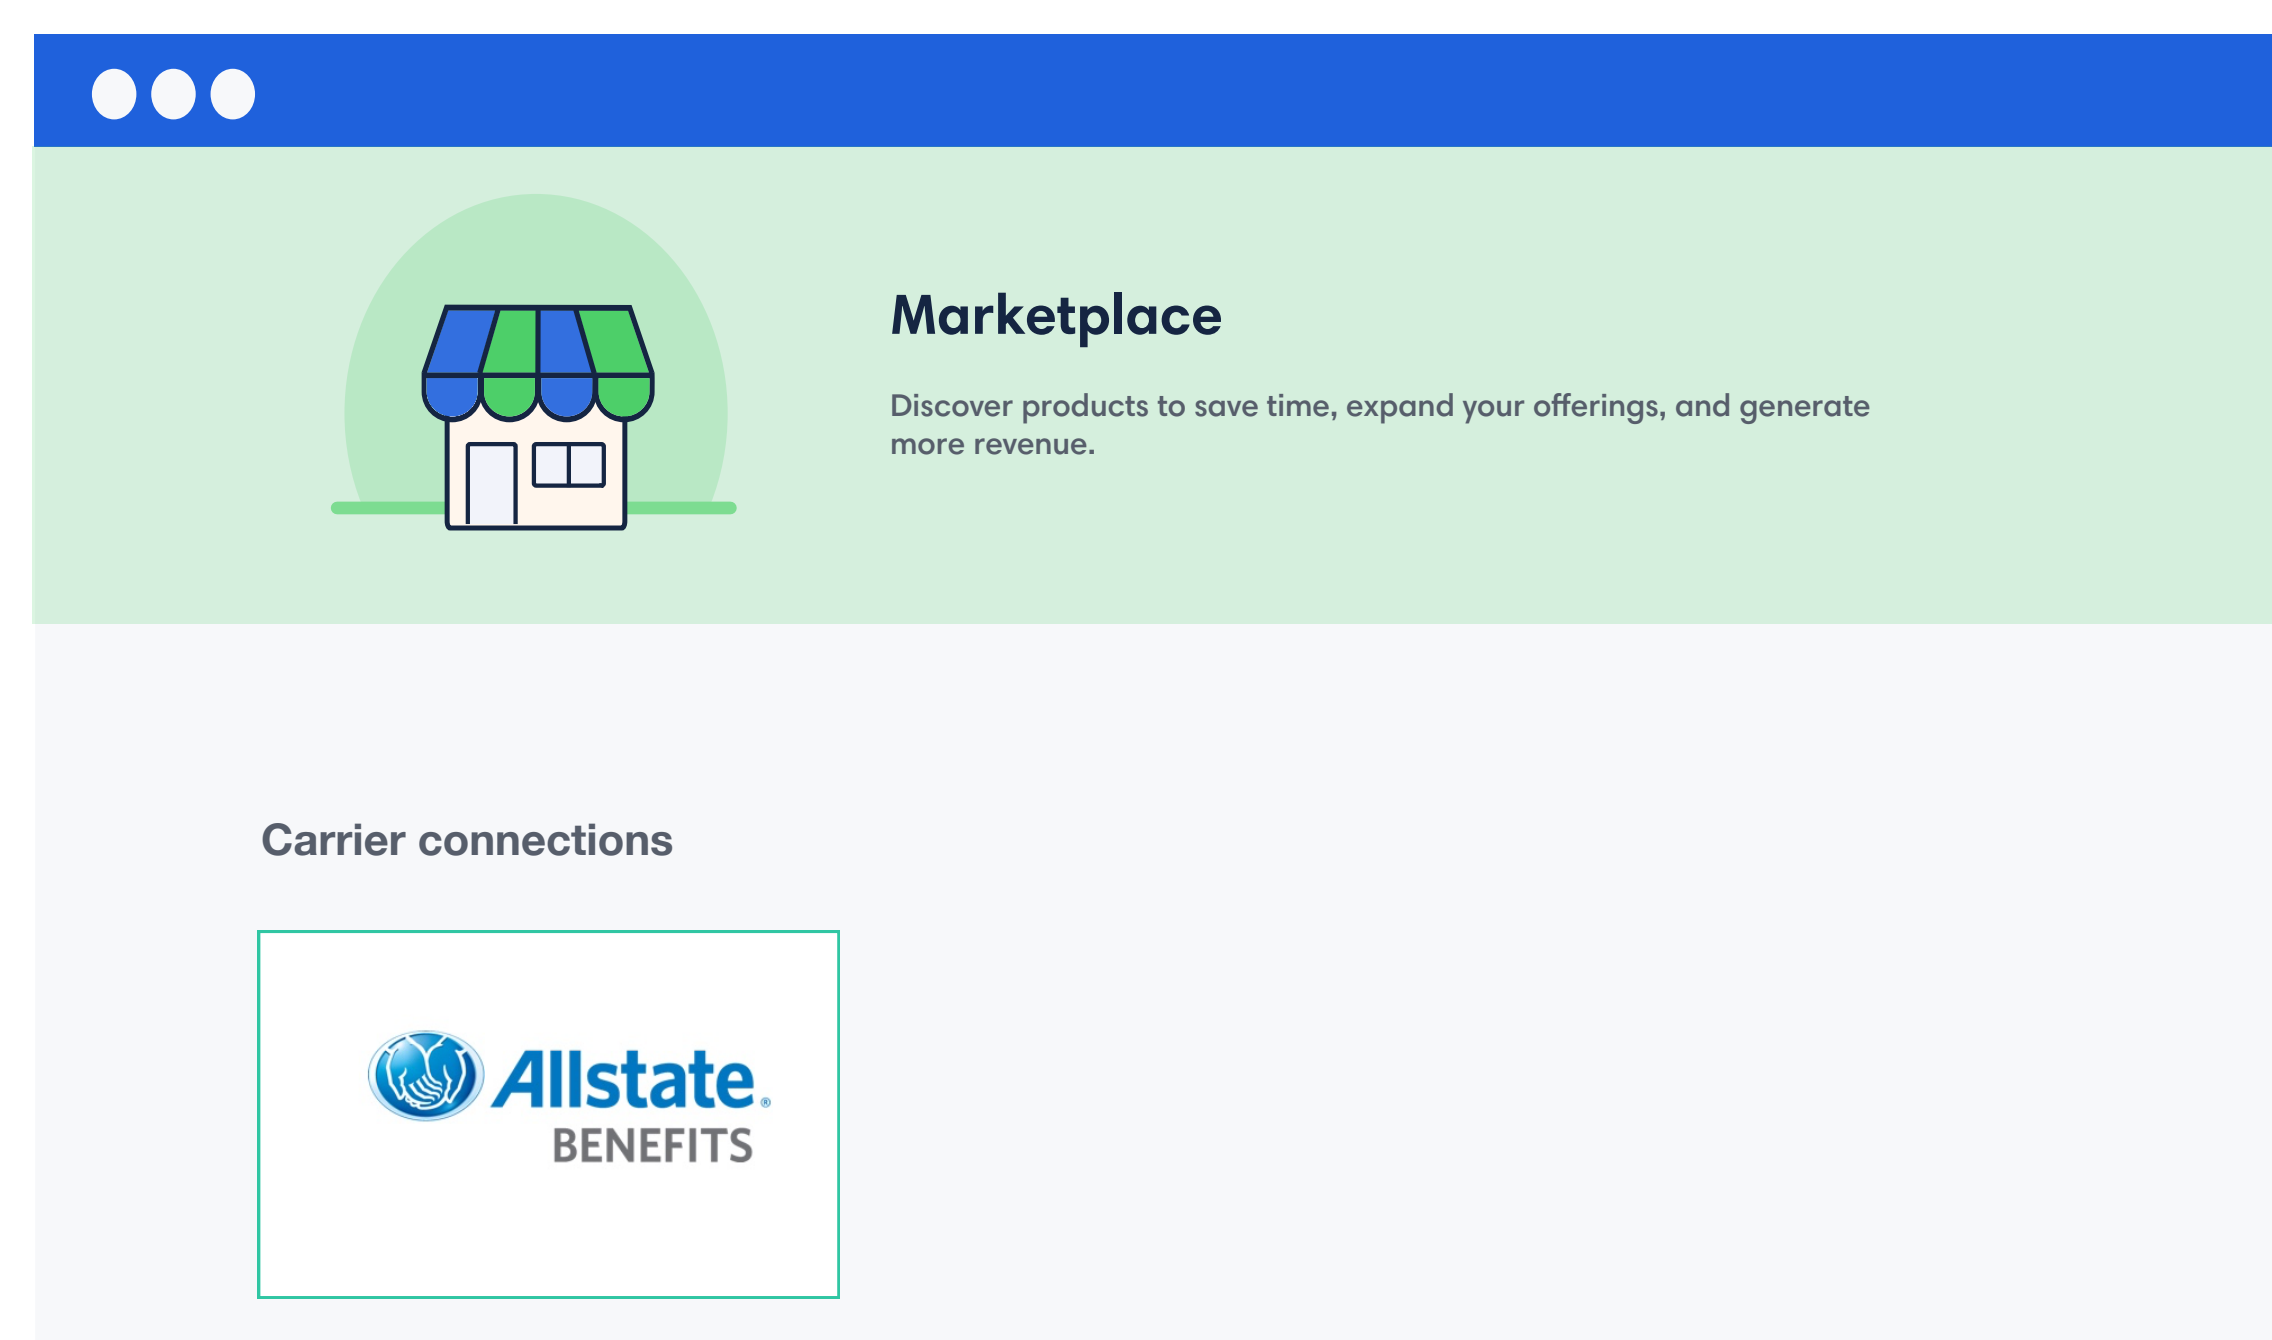

Direct Submission

Employees can enroll in Allstate Benefits plans and view the actual cost per pay period for each Allstate Benefits plan. After the initial submission, enrollment data will be automatically sent to Allstate Benefits on a monthly basis.

Automatic Changes

All adds, changes, and terminations will be automatically sent to Allstate Benefits on a monthly basis.

Enable

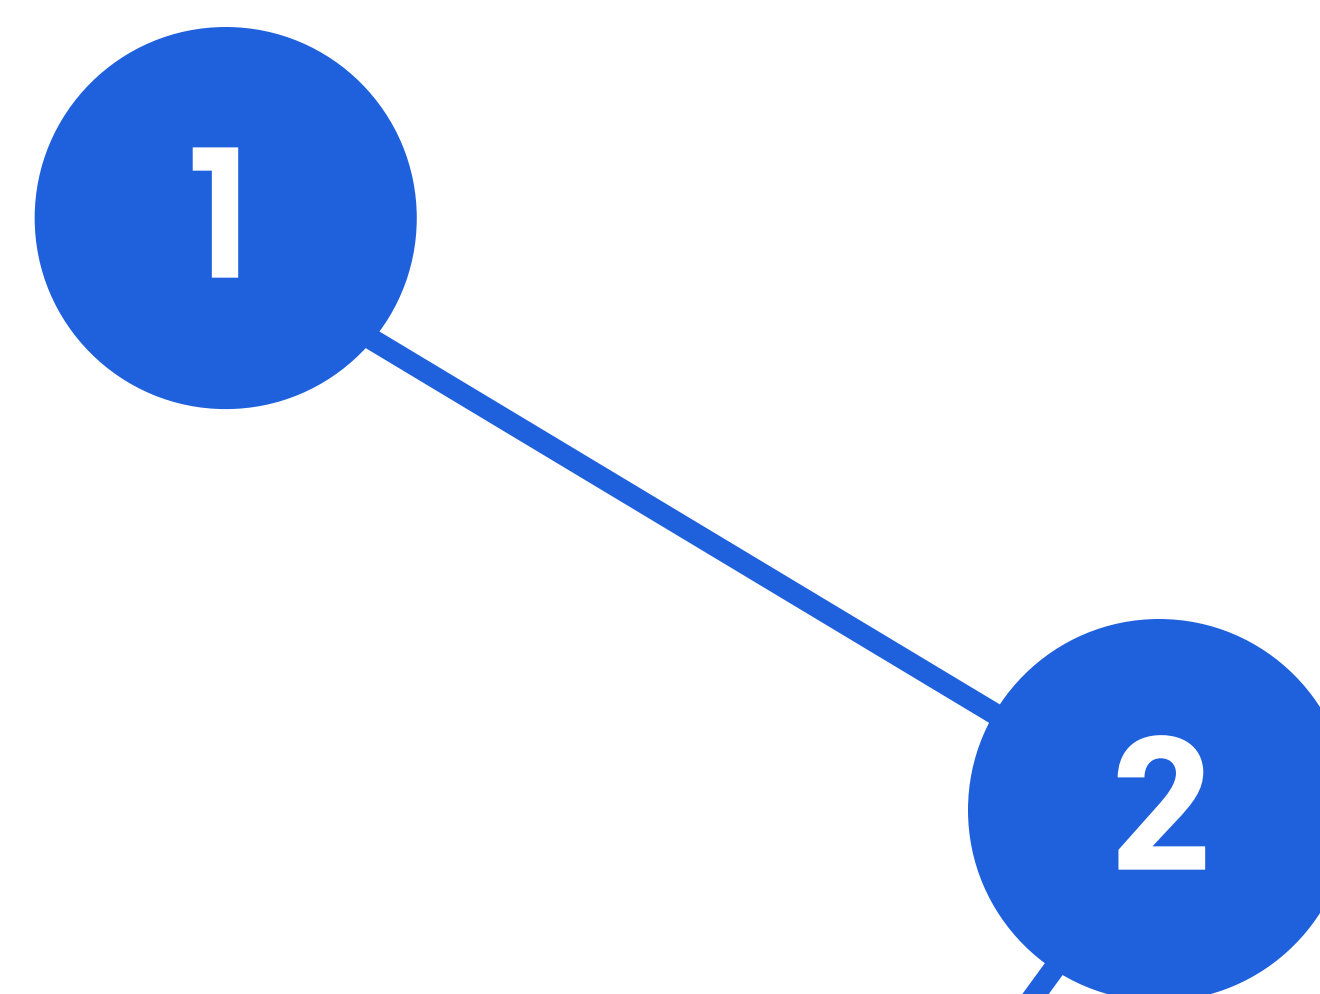

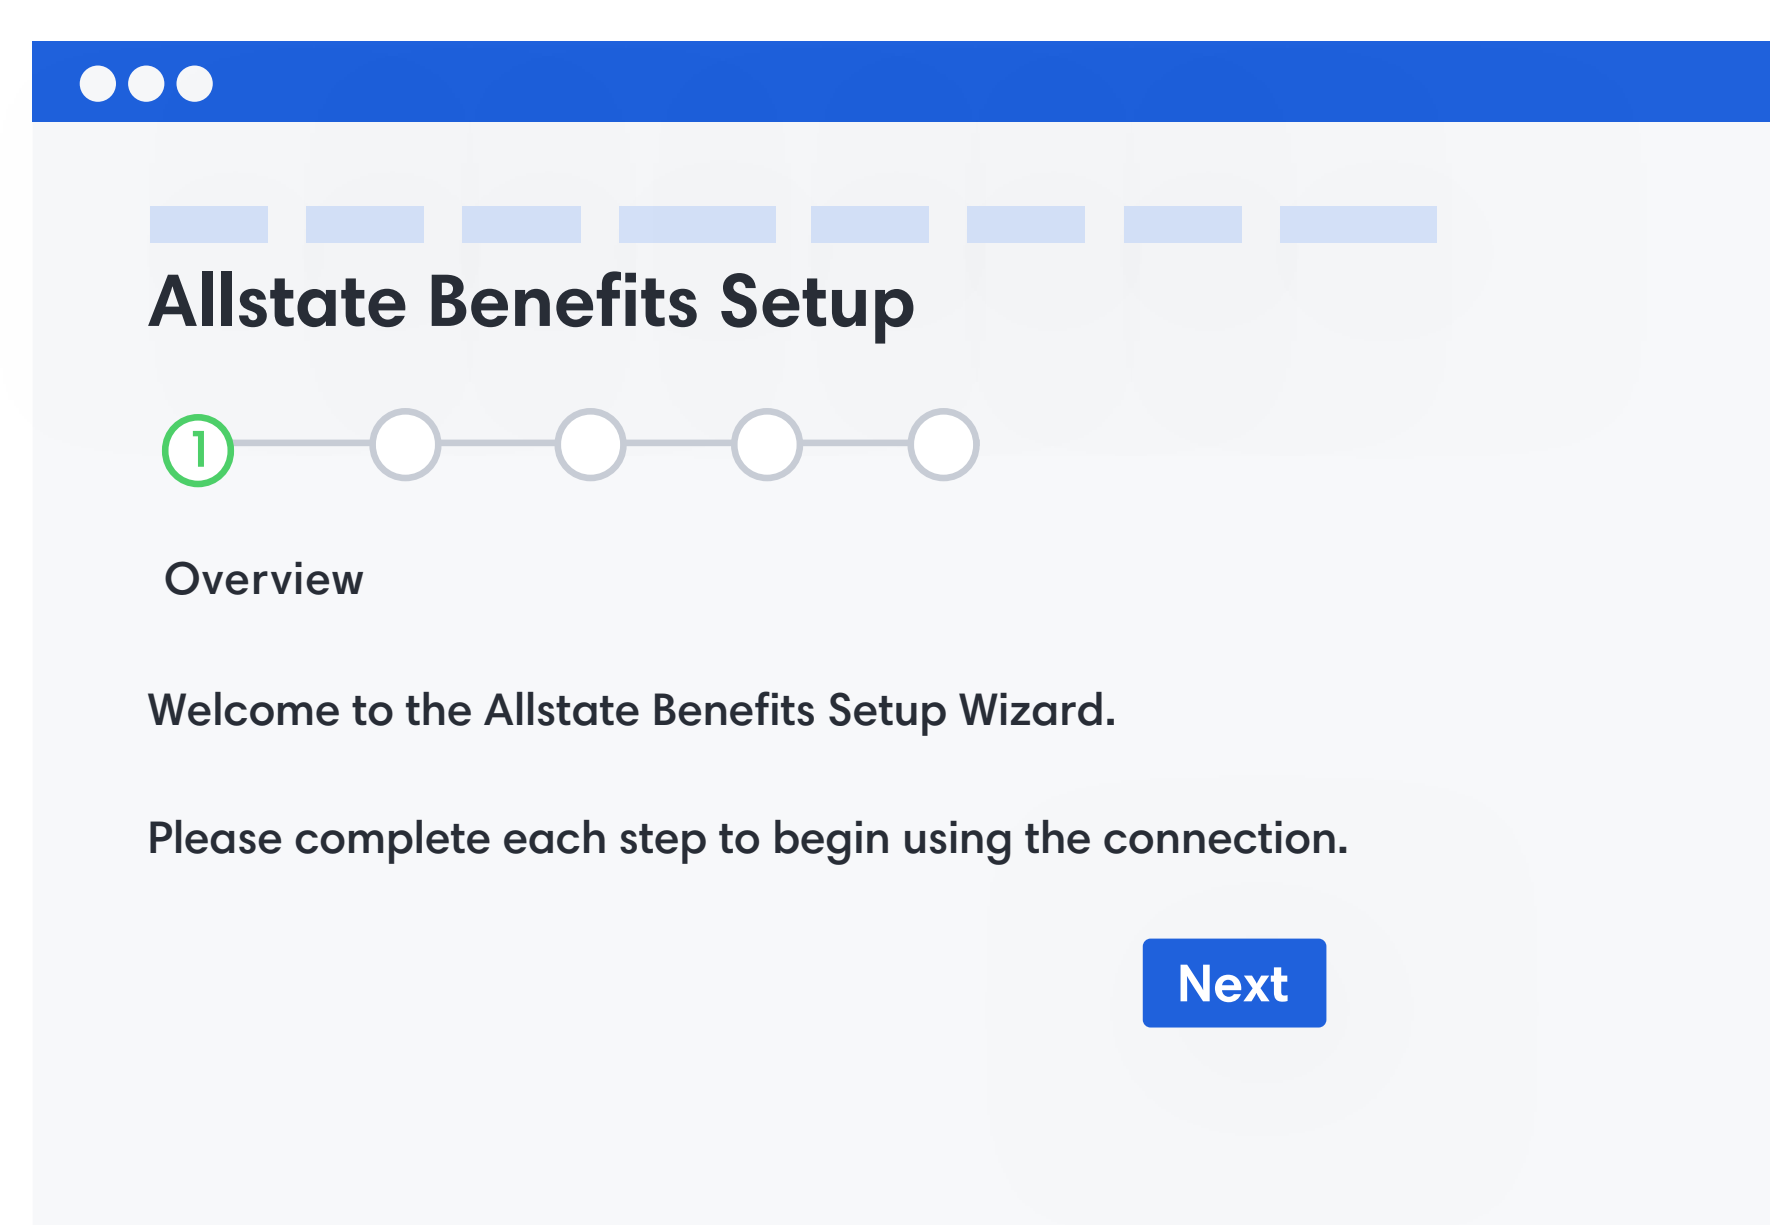

How To Activate

Enable Allstate Benefits in your Marketplace. Then, enable the connection for each group you would like to use the connection for.

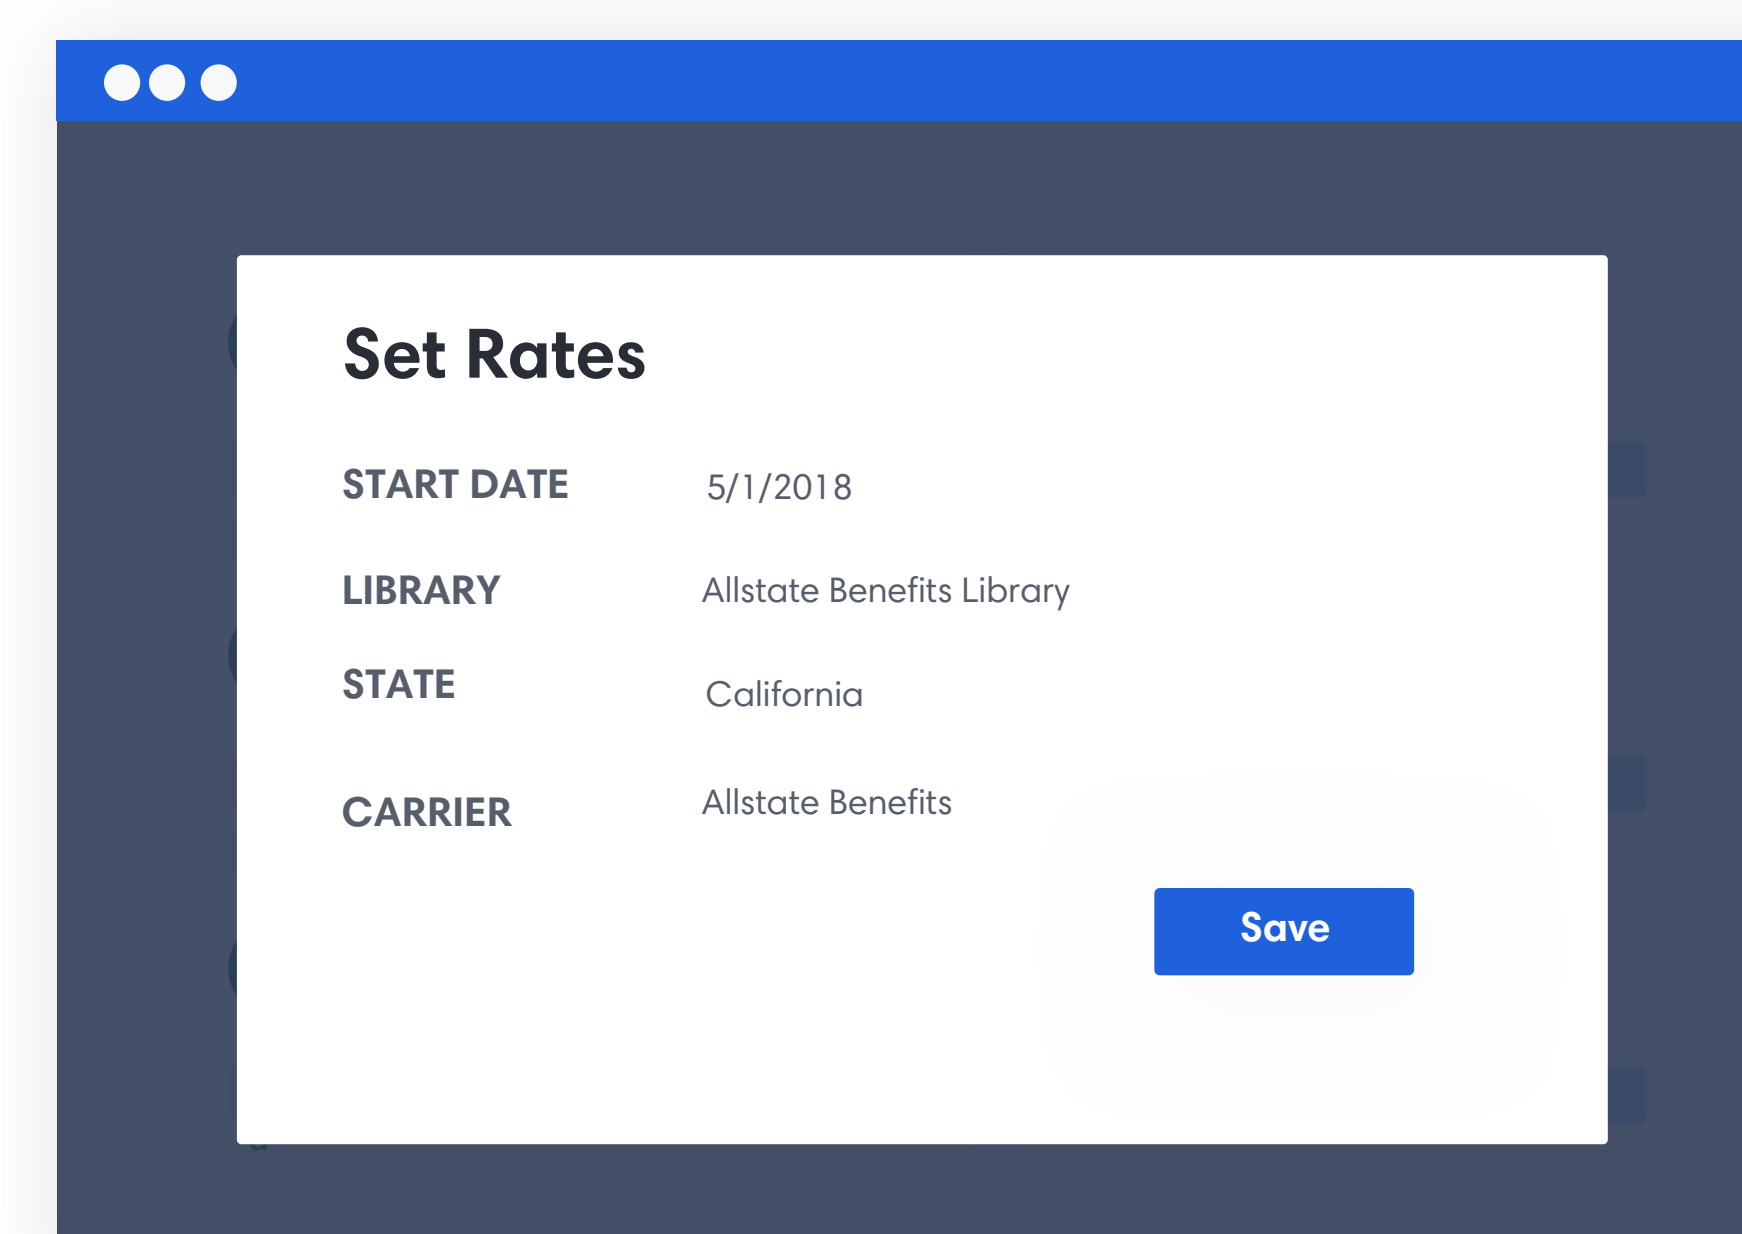

**This connection is available for Allstate Benefits' L70 and Genelco products. This includes accident, cancer, dental, critical illness, short term disability, vision, hospital confinement, and life.*

How It Works

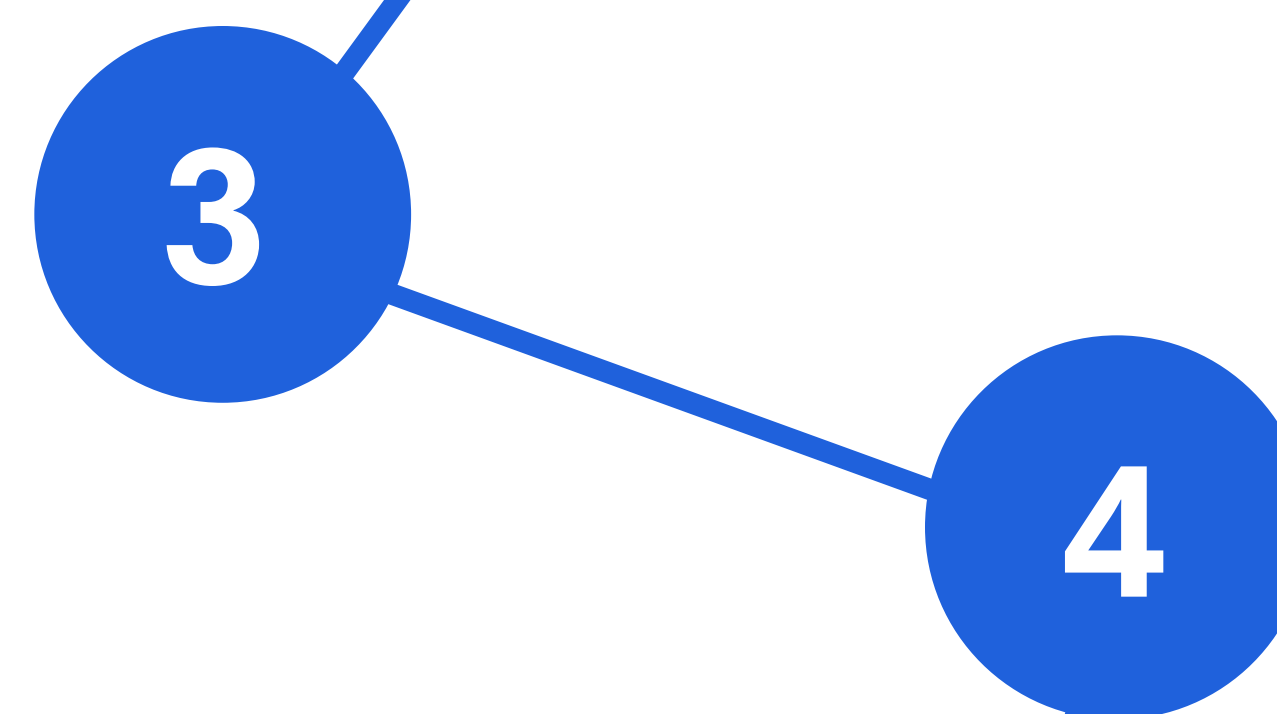

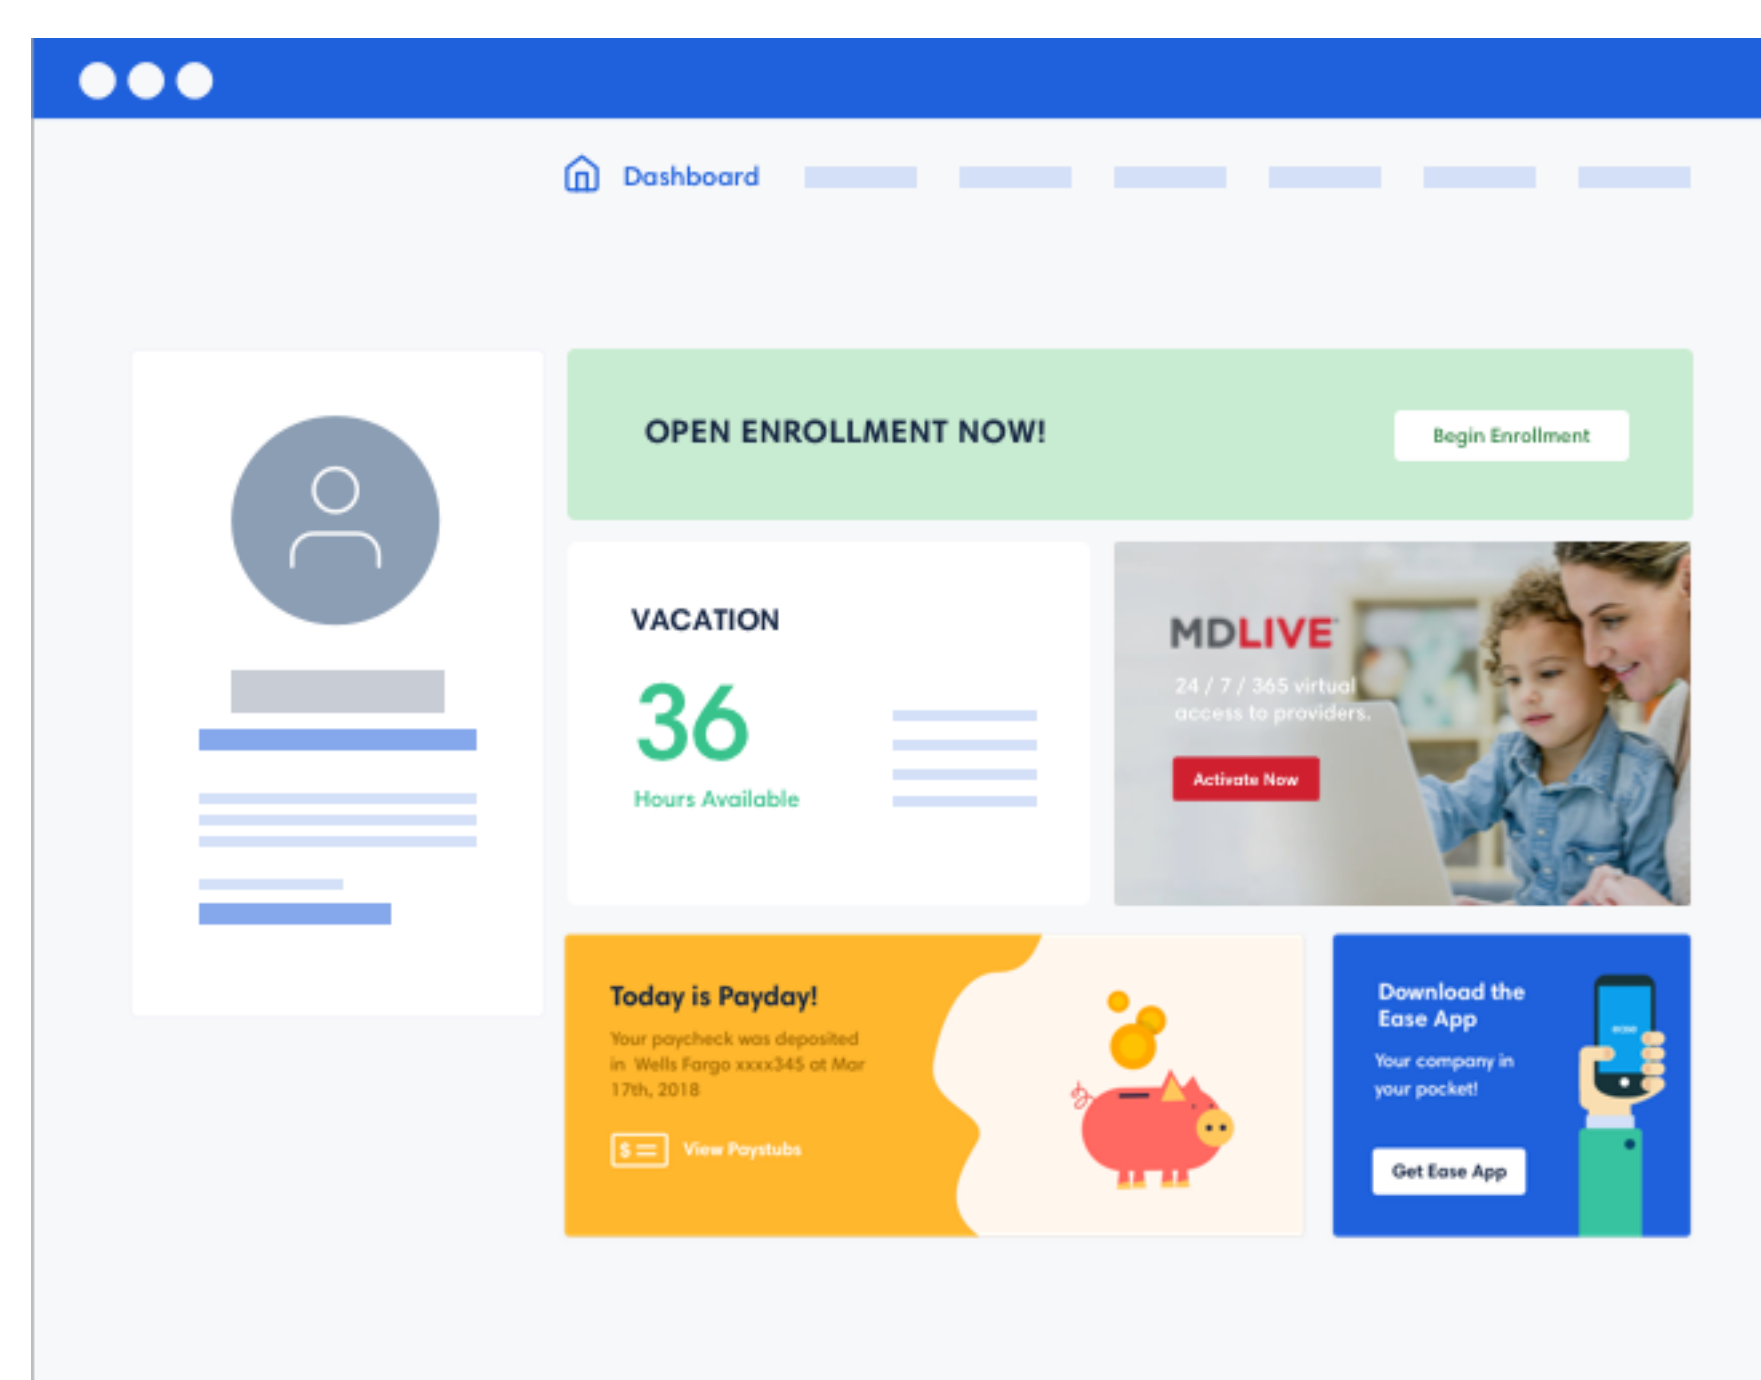

Enable the Allstate Benefits connection in the Ease Marketplace.
This step will change your connection status to "Pending."

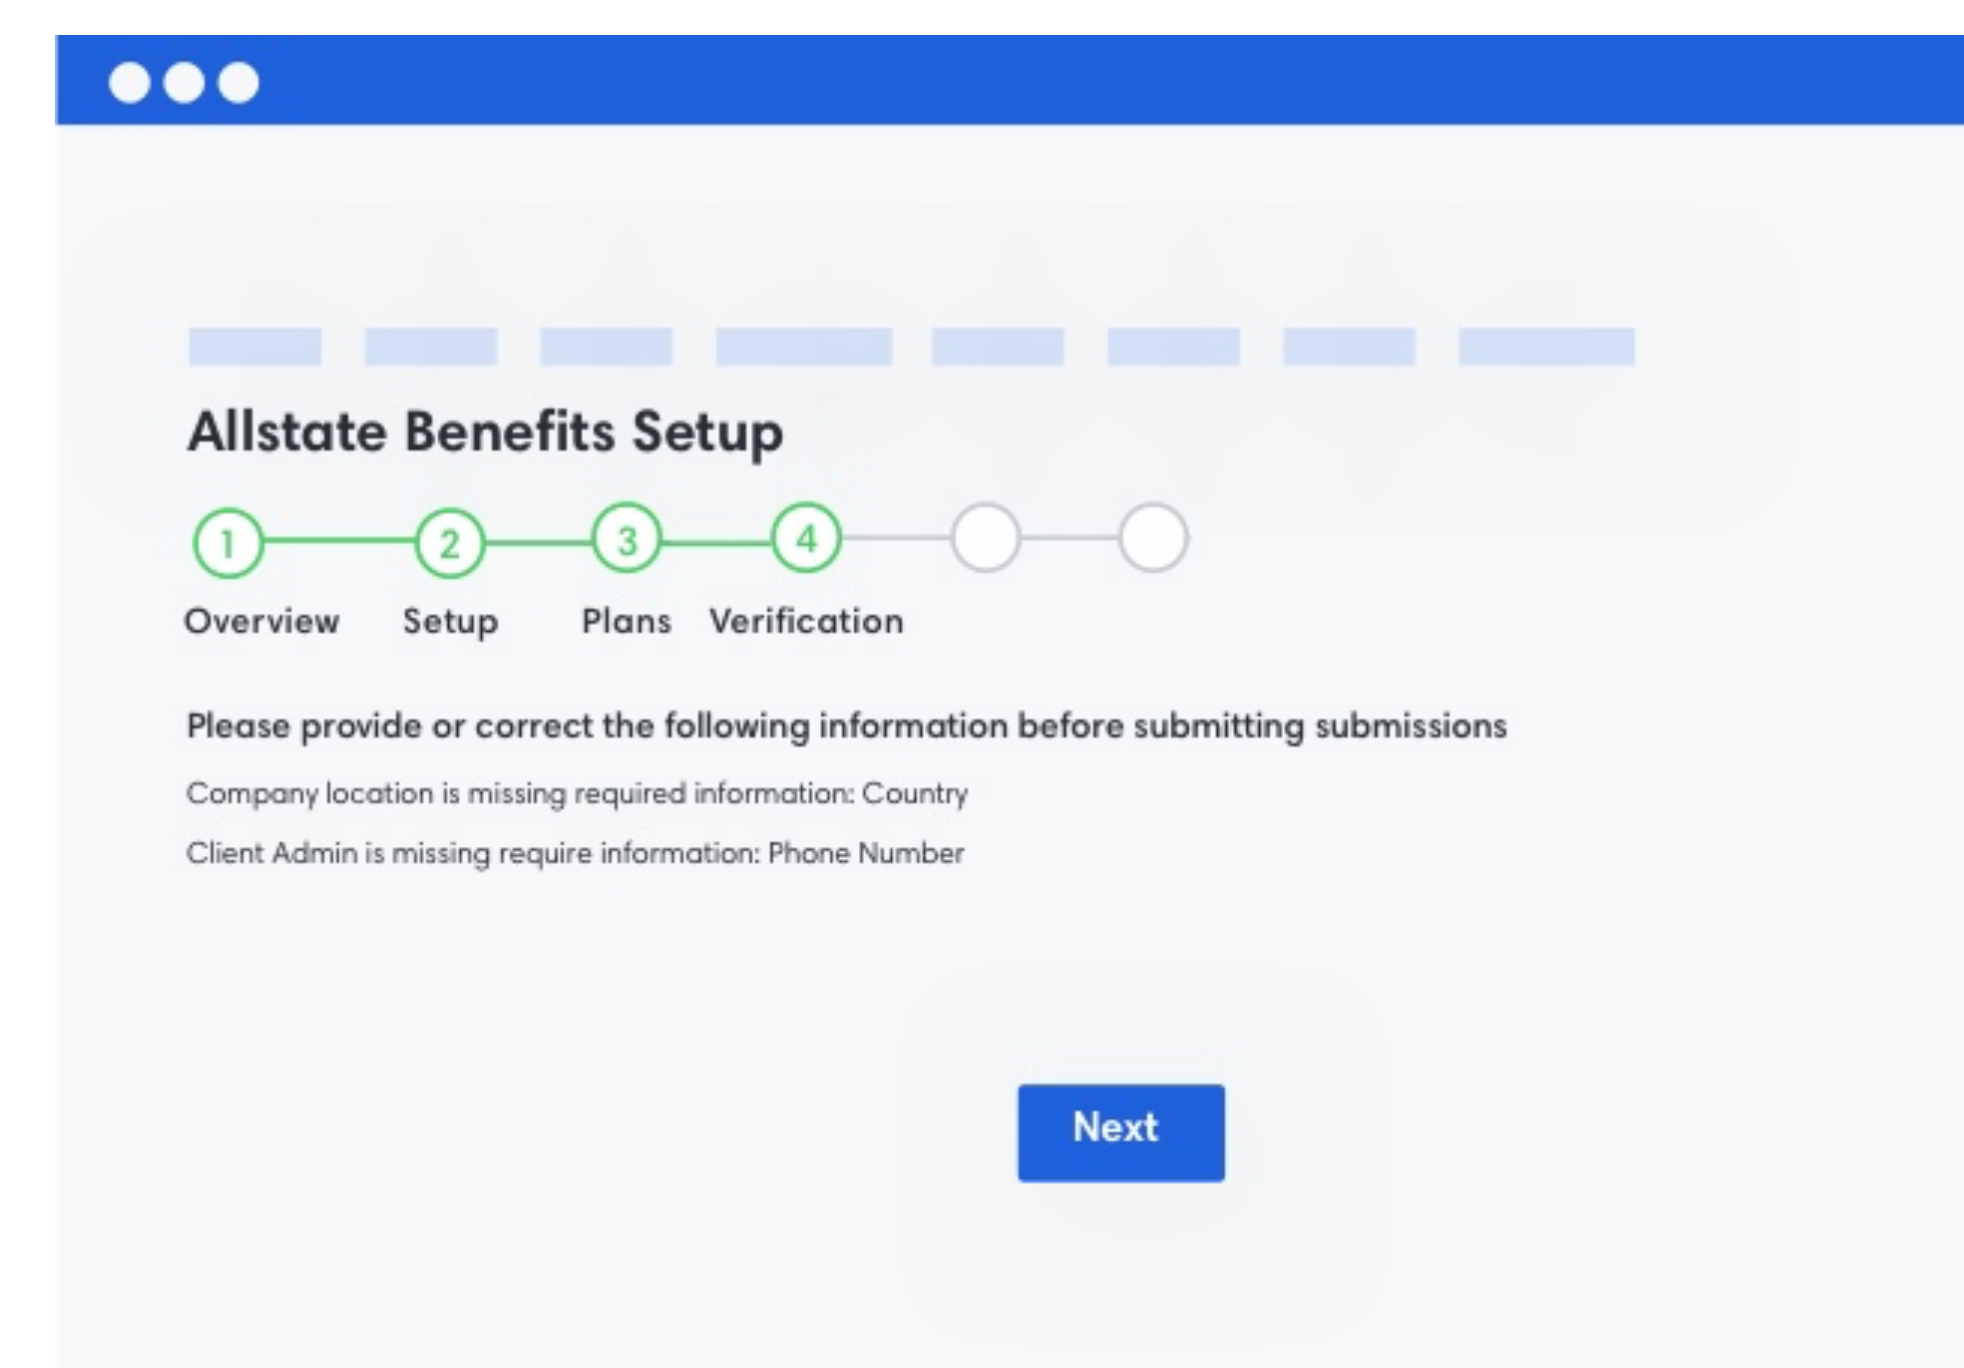

For initial enrollment only, add the appropriate Allstate Benefits Plans. Then, use the Allstate Benefits Rate Library to set rates and configure additional details like eligibility, start date, and state.

Time for benefits enrollment! Once logged into Ease, employees will be able to enroll in the Allstate Benefits plans you set up.

Directly submit initial enrollment data for your group to Allstate Benefits via the Marketplace Wizard. After the submission is approved, your connection status will change to "Approved."

Once you are in the "Approved" status, all enrollment data will be automatically sent to Allstate Benefits on a monthly basis. Adds, changes, and terminations will also be sent monthly.
