

easecentral × **TRAX**Payroll

EaseCentral & TRAXPayroll have partnered to
make benefits and payroll easy.

One location for employees to access Payroll & Benefits.

Simple Setup

When setting up your group's TRAXPayroll account, employee demographic, compensation, benefit deductions, and onboarding data will be synced from EaseCentral to TRAXPayroll, eliminating the need for duplicate data entry.

Always in Sync

Each pay period, Easecentral automatically sends deduction changes and, if tracked in EaseCentral, time off taken to TRAXPayroll while TRAXPayroll sends any demographic file changes to EaseCentral so your accounts are always up to date.

Paystubs in EaseCentral

With EaseCentral's TRAXPayroll integration employees can view their paystubs straight from their EaseCentral account.

Price Plan

\$0 pepm

TRAXPayroll may charge a separate fee.

How to activate

If your group already uses TRAXPayroll, please reach out to their TRAXPayroll account manager directly.

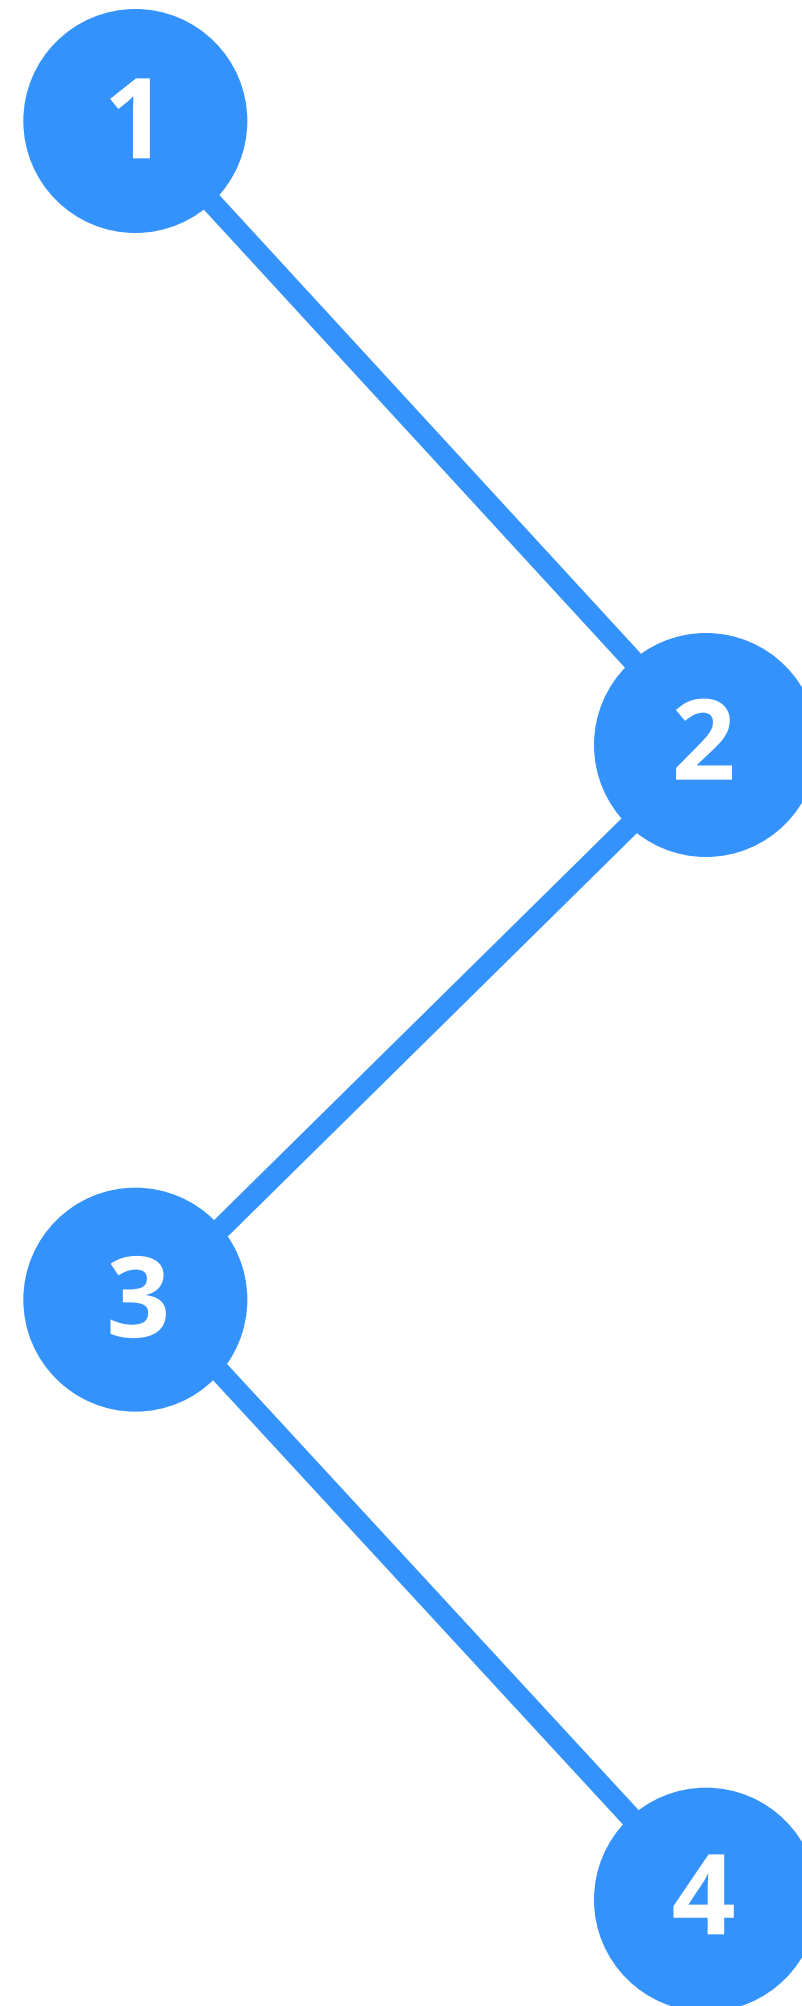

If a group is interested in switching, contact TRAXPayroll sales at 1 (866) 549-1610.

How to Get Started

Once you've completed and submitted the Implementation Requirements form to TRAXPayroll, they will reach out to EaseCentral to start the integration.

EaseCentral will host a kickoff call with you, a member of the TRAXPayroll team and your group admin to confirm set up and preferences. Once completed, EaseCentral will begin a short testing phase with TRAXPayroll.

In the initial setup and for any updates, EaseCentral will sync employee demographics, compensation and enrollment data with TRAXPayroll. If your group has Onboarding turned on that information (W-4 and Direct Deposit) can also be synced with TRAXPayroll.

Once test files are successfully received and loaded, the integration will be turned on and the data will flow automatically. Employees can access their TRAXPayroll paystubs in their EaseCentral dashboard.
