

Access to prescription medications during COVID-19

Our members' health is our top priority. To ensure our members continue to have access to their prescription medications during this time, we have compiled a list of options for our members.

Refilling prescriptions

Members with pharmacy benefits through Blue Shield may request early prescription refills directly from their current pharmacy.

Free home delivery with network retail pharmacies

To meet member needs and promote social distancing, many retail pharmacies are waiving fees for home delivery of prescriptions. At this time, the following Blue Shield network retail chain pharmacies are offering free home delivery. Members are encouraged to visit the pharmacy's website or call their local pharmacy for more information.

- CVS Pharmacy®
- Albertsons Companies (Safeway/Vons/Osco/Sav-on pharmacies)
- Walgreens Pharmacy

Mail service pharmacy

Blue Shield members also have access to ordering a 90-day supply through our mail service pharmacy, CVS Caremark®, with no delivery fee. These 90-day supply prescriptions are available for maintenance medications used to treat chronic conditions. Learn more about how to get a 90-day prescription at blueshieldca.com/90dayRX.

For the most up-to-date information about member coverage and care options during this time, visit blueshieldca.com/coronavirus.
